

David Allaway has worked at the intersection of waste, materials, and environment for over thirty years. He is currently a senior policy analyst in the Materials Management Program at the Oregon Department of Environmental Quality (DEQ). David has served as an invited science advisor to Wal-Mart's Packaging Sustainable Value Network and as an advisor to the New York Times bestseller *Drawdown: The Most Comprehensive Plan Ever Proposed to Reverse Global Warming*. He recently (2019-2020) co-chaired Oregon's Recycling Steering Committee and helped to develop and advance Oregon's Plastic Pollution and Recycling Modernization Act – comprehensive recycling and producer responsibility legislation which was signed into law in 2021. The recipient of national awards from the U.S. EPA and American Center for Life Cycle Assessment, David has a B.A. in physics (with honors) from Carleton College, Minnesota and is a member of Phi Beta Kappa.
